Compounds

Silicone Free – Panel Shop Safe.

AutoSmart's compounding products offer a high-quality, user-friendly system that is silicone-free, ammonia-free, and contains no fillers, ensuring real results without masking imperfections.

Suitable for both hand and machine use, the range is efficient, versatile, and features easy identification through color-coded caps and pads for seamless integration with AutoSmart machines.

EVO X - ULTRA FINE FINISH

AVAILABLE SIZES
1L POP TOP, 5L

Designed for paintwork with fine scratches or holograms and paper marks to P3000:

- Polishes to a high gloss mirror finish.
- Permanently removes holograms and swirls.
- No fillers, ideal for use with ceramics.
- Extremely fast and easy to use.
- Ultra-low dust.
- **Silicone Free – Panel Shop Safe.**

EVO X - HEAVY

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1200:

- Unbeatable scratch removal with a high-quality finish.
- Adaptive cut that turns what previously was a 2-3 step correction into a single one-step process.
- No wax or fillers.
- Ultra-low dust.
- **Silicone Free – Panel Shop Safe.**

EVO ULTRA

AVAILABLE SIZES
1L POP TOP, 5L

Designed for paintwork with fine scratches or holograms and paper marks to P3000:

- Fine abrasive compound for the permanent removal of holograms and swirl marks.
- Contains homogenised micro polishing abrasives designed to produce a high gloss finish on all paint finishes.
- Perfect for use on dark coloured finishes and is engineered for easy clean-up.
- Ideal for the removal of compound swirls and buffer trails.
- **Silicone Free – Panel Shop Safe.**

EVO 1

AVAILABLE SIZES
1L POP TOP, 5L

Designed for paintwork with fine scratches or holograms and paper marks to P3000:

- Evo 1 is ideal for fine finishing, hologram and swirl mark removal.
- Easily removes fine scratches and surface defects, polishing the surface to a swirl-free deep mirror finish.
- Perfect for machine or hand use, best used when small surface defects are present.
- Suitable for all paint colours.
- **Silicone Free – Panel Shop Safe.**

EVO +

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1500:

- Specialised medium grade cutting compound developed with a diminishing abrasive.
- Has an adaptive cut that turns what was previously a 2-3 step correction into a single one-step process.
- Corrects paint to an extremely high gloss and is engineered for an easy clean-up.
- Contains a higher level of lubrication allowing for higher speed cutting with less risk of surface damage.
- **Silicone Free – Panel Shop Safe.**

EVO 3

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1500:

- Evo 3 is a medium grade cutting compound ideal for flattening marks, scratching, and removal of deep marring.
- Removal of water/acid etching.
- Ideal for paint correction where denibbing has been carried out, correcting paint to a high gloss, and is engineered for an easy clean-up.
- **Silicone Free – Panel Shop Safe.**

EVO 4

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1500:

- Evo 4 is a medium to coarse grade cutting compound ideal for flattening marks, scratching, removal of deep marring.
- Removal of water/acid etching.
- Ideal for the correction of sanding marks introduced when denibbing.
- Corrects paint to a high gloss and is engineered for an easy clean-up.
- **Silicone Free – Panel Shop Safe.**

EVO 5

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1200:

- Medium to coarse grade cutting compound ideal for paint correction. This includes flattening marks, scratching, removal of deep marring and the removal of water/acid etching.
- Ideally used for oxidised paint, fibreglass and gel coat finishes and for correcting sanding marks introduced when denibbing.
- Engineered for an easy clean-up.
- **Silicone Free – Panel Shop Safe.**

EVO 6

AVAILABLE SIZES
1L POP TOP, 5L

Designed for the rapid removal of heavy scratches and sanding marks up to P1000:

- Evo 6 is the heavyweight in the Evo range, being ideal for heavy renovation work including deep scratching and flattening paint correction.
- Ideal choice when buffing heavily oxidised paint, fibreglass, and gel coat finishes.
- Suitable for working with fibreglass and other marine-based applications that require heavy cutting.
- **Silicone Free – Panel Shop Safe.**

ONYX CUT

AVAILABLE SIZES
1L POP TOP

Designed for the rapid removal of heavy scratches and sanding marks up to P1500:

- Onyx is a medium to coarse grade cutting compound ideal for flattening marks, scratching, removal of deep marring and the removal of water/acid etching.
- Used for the correction of sanding marks introduced when denibbing.
- **Silicone Free – Panel Shop Safe.**

SOPHISTICUT

AVAILABLE SIZES
1L POP TOP, 5L

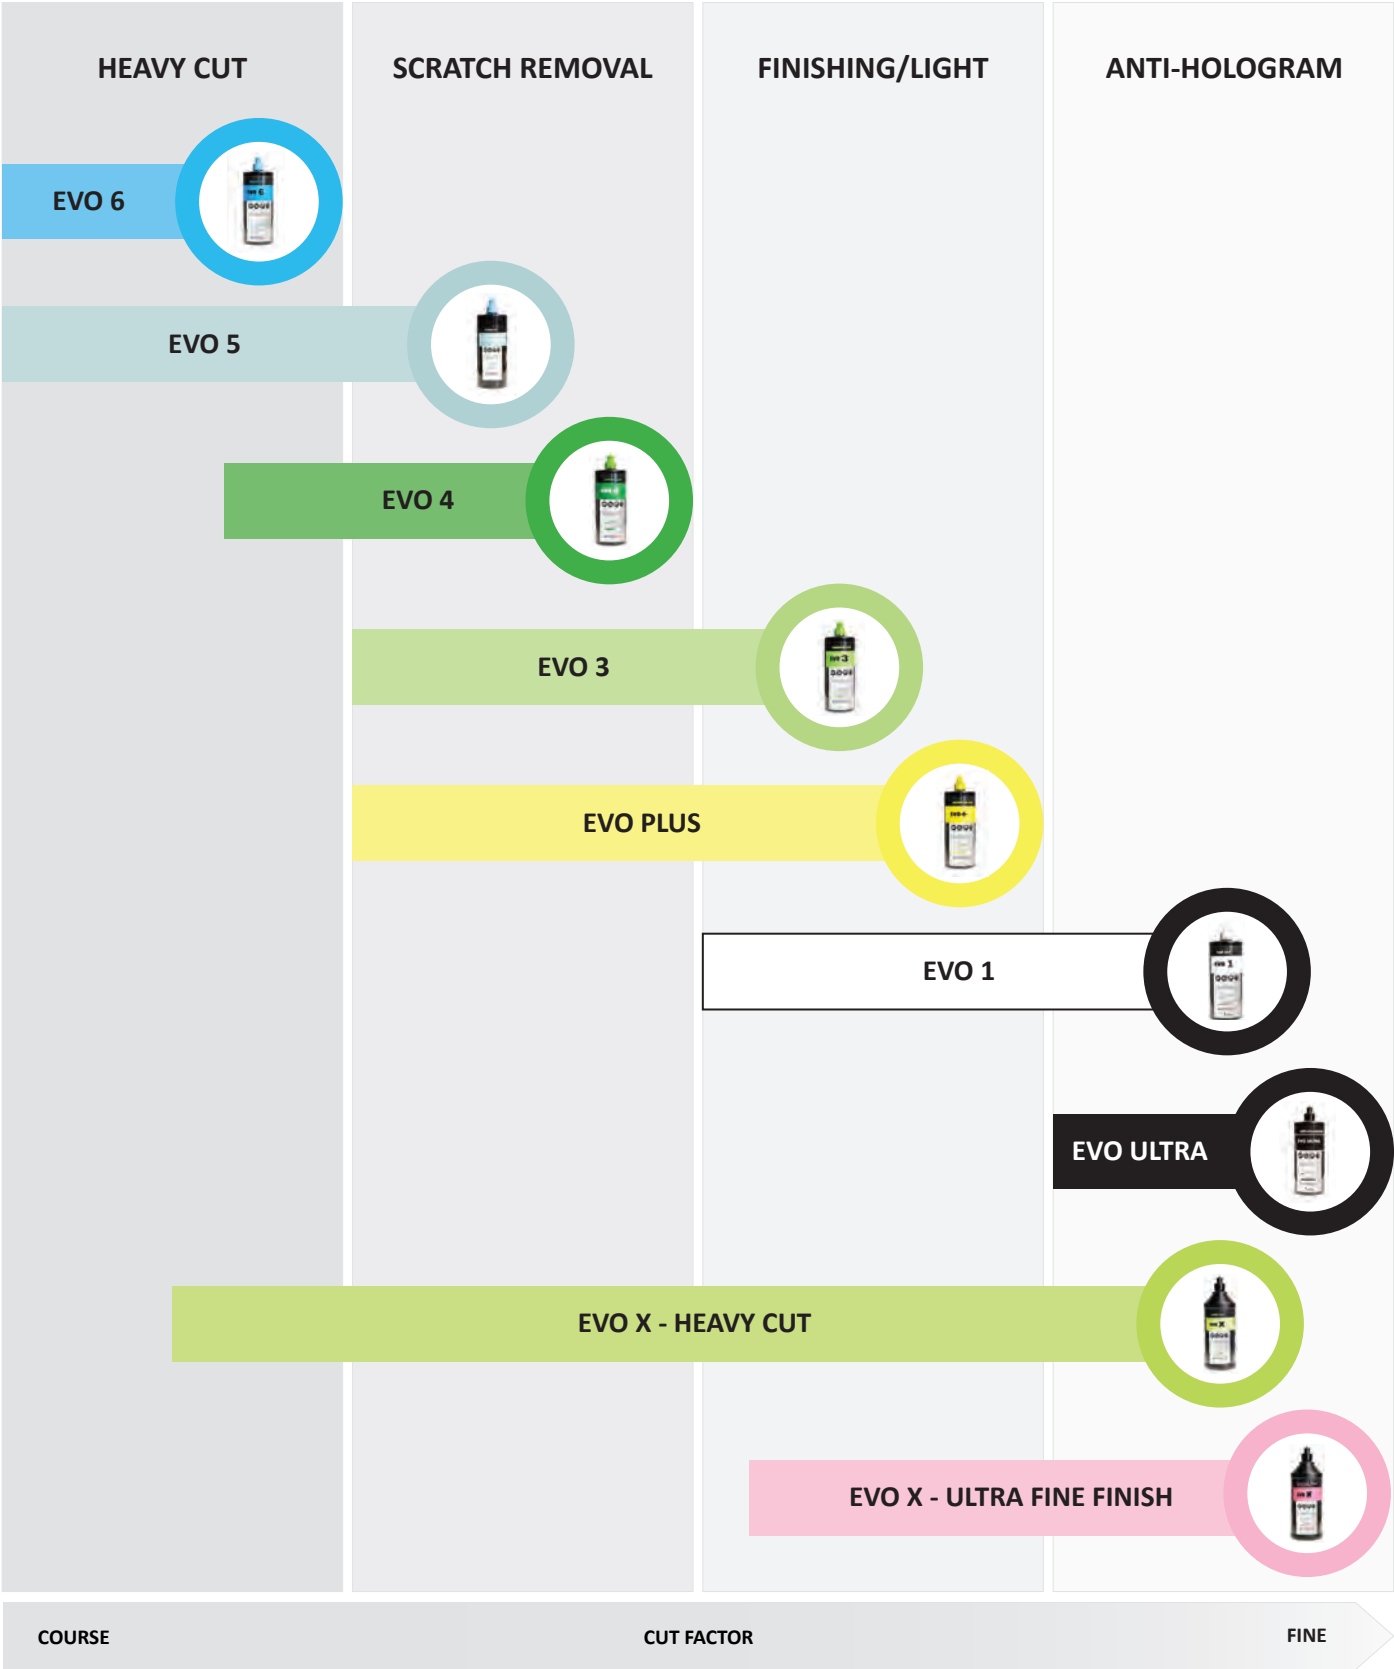

Designed for the rapid removal of heavy scratches and sanding marks up to P1500:

- Sophisticut is a medium grade cutting compound ideal for flattening marks, scratching, removal of deep marring and the removal of water/acid etching.
- Sophisticut is ideal for paint correction where denibbing has been carried out, correcting paint to a high gloss, and is engineered for an easy clean-up.
- **Silicone Free – Panel Shop Safe.**

CONTAINER SIZES

Polishes, Glazes, Sprays

AutoSmart's polishes, glazes and sprays are essential products that help achieve and maintain a showroom quality finish. Our quick detailers are easy to use and highly effective for removing smudges and fingerprints in showrooms and pre delivery. We offer a wide range of polishes and glazes to suit every requirement, from aged paint surfaces to new vehicles.

AQUASEAL SiO2

AVAILABLE SIZES
1L, 5L, 20L, 200L

Aquaseal SiO2 is a foaming high gloss spray sealant that protects and shines in one operation.

- Highly durable weather resistant results.
- Contains hydrophobic water repellent polymers for faster drying.
- Saves time and effort compared to conventional polishes.
- Aquaseal SiO2 rapidly seals larger vehicles like trucks, buses, agricultural and earthmoving equipment.

BLACK POLISH

AVAILABLE SIZES
1L POP TOP, 5L

Black coloured premium wax polish.

- Quick to apply and easy to remove.
- Black Polish's advanced reactive polymers bond to the surface, making it weather resistant & giving a long-lasting, deep shine.

CHERRY GLAZE

AVAILABLE SIZES
1L POP TOP, 5L, 20L

The fastest, easiest polish on the market.

- Rapid and easy to apply, Cherry Glaze dries extremely quickly for easy removal.
- Especially good as a pre delivery inspection (PDI) polish or for removing fingerprints.

COBALT

AVAILABLE SIZES
1L, 5L, 20L

A highly versatile spray polish, using ionic nanotechnology.

- Fast and easy results on wet and dry vehicles.
- Leaves an instant deep shine.
- This highly durable polish seals and protects paintwork, leaving a dust-free result.
- Perfect for showroom maintenance.

FINAL TOUCH

AVAILABLE SIZES
1L, 5L, 20L, 200L, 1000L

A quick detailer and pre delivery inspection (PDI) spray.

- Final Touch is ideal for removing fingerprints, dressing overspray and polish marks.
- Perfect for showroom maintenance and PDI's.
- **Silicone Free – Panel Shop Safe.**

GOLDEN TOUCH

AVAILABLE SIZES
1L, 5L, 20L, 200L

A highly versatile spray polish and quick detailer.

- Fast and easy results on wet and dry vehicles.
- This highly durable polish seals and protects paintwork, leaving a dust-free result.
- Perfect for showroom maintenance and final inspections.
- **Silicone Free – Panel Shop Safe.**

MIRROR IMAGE

AVAILABLE SIZES
1L POP TOP, 5L, 20L

AutoSmart Mirror Image is a premium wax polish designed for use on aged paintwork.

- Restores, cleans, and waxes in one simple 'on & off' process.
- Leaves a long-lasting shine.
- Mirror Image contains fine cutters to remove small imperfections & blemishes.

ONYX POLISH

AVAILABLE SIZES
1L POP TOP

Swirl removing pad glaze containing both aluminium oxide micro abrasives and hard setting advanced polymer polish.

- The cutters in Onyx Polish abrade the paint's surface to give a smooth even finish.
- The advanced polymer sealant eliminates any fine scratches and surface imperfections.

PLATINUM

AVAILABLE SIZES
1L POP TOP, 5L, 20L

A premium wax polish. Quick and easy to use.

- Platinum's advanced reactive polymers bond to the surface, making it weather resistant & giving a long-lasting, deep shine.
- Gives a rich shine, particularly on tired and faded paintwork.

TOPAZ

AVAILABLE SIZES
1L POP TOP, 5L, 20L

The first 'hybrid' polish, containing both a natural wax and hard curing synthetic polymer coating.

- Topaz provides a deep luxurious shine on all paint finishes.
- Quickly restores dull and faded paintwork.
- Topaz leaves a long-lasting weather shield protective coating.
- Fast and easy to use.

WAX

Wax is a highly concentrated blend of 4 waxes including Carnauba & Candelilla wax.

- Produces a highly durable deep 'wet look' gloss.
- A hard wax offering ultimate shine & protection.

5.4

CONTAINER SIZES

Paint Protection

Ceramic coating has revolutionised the way we protect and maintain our vehicles, offering a range of benefits that go beyond the traditional waxes and polishes. AutoSmart's range of paint protection products are industry leaders in durability, depth of shine and water hydrophobicity.

HYBRID CERAMIC

AVAILABLE SIZES
30ML

Hybrid Ceramic provides the benefit of both an amino-functional siloxane polymer polish and a harder wearing ceramic.

- Our Hybrid Ceramic coating uses latest generation technology to provide shine, definition, super hydrophobicity.
- 9H Hardness.
- Durability up to 3 years.
- Ideal for paintwork, wheels and glass.

MATRIX BLUE

AVAILABLE SIZES
50ML

Matrix Blue is a ceramic coating, using latest generation technology to provide shine, definition and super hydrophobicity.

- Durability up to 3 years.
- Ideal for paintwork, wheels and glass.
- 9H Hardness

RECHARGE +

AVAILABLE SIZES
500ML, 1L

Matrix Recharge+ is a highly durable SiO2 spray coating that creates a hydrophobic high gloss slick finish.

Matrix Recharge+ can be used:

- As a standalone SiO2 Coating
- As a topcoat after application of Matrix Blue or Hybrid Ceramic Coatings

SILVER SEAL PAINT PROTECTOR

AVAILABLE SIZES
AEROSOL

Coats paintwork with an invisible second skin, protecting it against the elements.

- Silver Seal Paint Protection uses advanced polymer technology to create a hard-wearing seal.
- Protects paintwork from the effects of rain, sunlight, ice and snow.
- Aerosol application is quick and easy.
